# Calculation of the best price on high-tech goods

© E.N. Gorlacheva, A.A. Anik'eva, V.I. Plekhanov

Bauman Moscow State Technical University, Moscow 105005, Russia

*The main purpose of the article is to consider the innovative product market — namely, genes sequencer. We defined the type of the market and conducted a competitive analysis based on M. Porter's model. We examined the main price factors and showed the results of the calculation of the genes sequencer optimum price.*

**Keywords:** innovative products, market analysis, demand function, the optimal price.
