*The paper gives a classification of services rendered at medicoprohylactic institutions and a classification of medical institutions by a number of typological features. The organizational management structure of medicoprohylactic institutions is studied through the example of the clinical hospital of I.M. Sechenov First Moscow State Medical Academy. The conclusion is made on the necessity of restructuring the organizational management structure, a method for practical implementation of the restructuring is proposed. Particular attention is paid to the MRI system as the most hightech diagnostic method.*

**Keywords:** *medicoprohylactic institution, organizational management structure, MRI.*
