The paper examines social technologies as an integral tool of the current foreign policy which is actively applied for destructing the state constituent integrability. The research provides an insight into the state constituent integrability and its role under the conditions of globalization. The special attention is paid to non-forced technologies for changing the political regimes, tools for destructing the statehood. The study takes a new approach to counteract the state constituent integrability destruction and loosing its sovereignty.

Keywords: *state, statehood, state integrity, social technologies, humanitarian technologies, soft force, state constituent integrability, non-forced technologies, political elite, globalization, state sovereignty, controllable chaos, national safety*
